### VACCINE – A CCI Newsletter

Because prevention is better than cure

e-newsletter 3 April 2020

## Welcome to the third issue of VACCINE – the CCI Newsletter!

The last few weeks have been challenging for all of us, with Covid-19 social distancing in nearly all countries dramatically changing our working culture. At the same time, the crisis

has also highlighted examples of truly inspiring community activism and mutual support across all areas of society. Community engagement — a recurring theme in CCI — is proving a valuable strategy. For the CCI project, our normal day-to-day routine has necessarily changed. Some CCI partners in law enforcement agencies (LEAs) have been pulled into other roles, filling in

Over the last six months, CCI partners have continued their work in our four CCI focus areas:

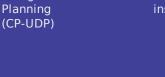

for colleagues who are self-isolating. The work of Cutting Crime Impact continues, however, and the Consortium sends our best wishes to all members of the CCI network.

CCI partner law enforcement agencies (LEAs) worked with partners and stakeholders to undertake research in the above focus areas. From this research, they developed

Measuring and

support the design development of their toolkits. These CCI Toolkits will be demonstrated later in the project. In our first newsletter, we mentioned that CCI Partners were developing reports on the 'state-of-the-art' in each focus area. From these reports, and with further research, the University of Groningen (RUG) have conducted detailed reviews on the ethical, legal and social issues impacting all four CCI focus areas. Consortium partner Efus has taken the initiative to publish 'factsheets' based on the CCI state-of-the-art reports, to support their wider dissemination. These factsheets have been translated into a number of different languages.

coherent descriptions of the issues and challenges they found in the form of 'problem statements'. These were further explored in collaboration with the rest of the Consortium through a series of DesignLabs held in September 2019 in Salford, UK. During these DesignLabs, partners explored the problem statements and generated various design ideas and concepts. These ideas were resolved into specific design directions for LEA toolkit development. LEAs are now undertaking research and prototyping activities to

The CCI DesignLabs — the LEA perspective

ingrained habits, knowledge, and thinking that you need to challenge in order to engage in a DesignLab is extensive. The CCI DesignLab held in Salford in September 2019 — my first DesignLab after joining CCI — was without a doubt a baptism of fire. The sessions, which were spread across two days, were intense and

strictly timed - with CCI partners acting as part of a giant machine working at full speed to transform their way of thinking about policing

problems. We came out of the DesignLab mentally exhausted, overwhelmed but also excited because we had something new in our hands, which meant that the work (and fun) had only just started. I recall going home the night after the first day of the DesignLab, and realising I completely lost my ability to speak English, and the ability

to master my mother tongue as well. I was that exhausted.
